

Cyrus 8₂ DAC Class-leading sound quality with system flexibility built-in

Product Information:

Recognised by thirty years of awards and accolades, Cyrus consistently pushes the boundaries of audio technology. We're tirelessly working towards the ultimate hi-fi system, which will reproduce the sound and feeling of a live performance without any interference or loss of detail.

The Cyrus 8₂ DAC is our most flexible integrated amplifier. A high quality and scalable design provides an impressive 88 Watts per channel, and includes six analogue inputs which you can individually name from a list of options in the set up wizard. Also included is a great headphone facility and twin speaker output for bi-wiring.

One of the outstanding features of this amplifier is that it is factory upgradeable allowing owners to retrospectively add the many other features found in the amps siblings. Cyrus 8₂ DAC is the perfect partner for the CD i or CD t.

Cyrus 8₂ DAC features and benefits

Trickle Down Advanced Technology:

The Cyrus 8₂ DAC delivers surprising audio performance and value because it is based on the advanced preamplifier circuitry from the DAC XP Signature; benefitting from a 'trickle down' of our most advanced technology.

Integrated Amplifier:

The bi-wire output of the 8₂ DAC gives a full 88 Watts into 6 ohms. The power supply is a high current design that uses two transformers to completely separate the digital control stages from the sensitive audio signals.

Integrated DAC:

The 8₂ DAC features a high performance 24/192 DAC bringing optical and coaxial inputs and a driverless USB connection allowing plug and play connectivity to a PC or Laptop. This DAC can be further upgraded to 'Qx' specification bringing in dual mono, upsampling DAC design from the DAC XP Signature.

Essential Connectivity:

Six analogue inputs, a high quality headphone amplifier, Zone 2 and pre amplifier outputs give the 8₂ DAC flexibility for connecting a wide variety of audio devices. There is also a PSX-R port on the 8₂ DAC allowing connectivity of the instant upgrade off-board power supply.

Advanced Setup:

The microprocessor controlled operating system in the 8₂ DAC allows extensive programming of many functions within the unit. Input naming, differing display readouts and input volume matching across all sources are just some of the possibilities.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.

Suggested System

8₂ DAC + PSX-R₂ + CD i

Cyrus 8₂ DAC Specifications

Integrated amplifier

24 Bit / 192k DAC

Custom input naming

iR14 Remote control included

5 digital / 6 analogue inputs

USB input

Pre out

Zone 2 output

Headphone amplifier

2 x 88W into 6 Ω

Dimensions (H x W x D) – 73 x 215 x 360 mm

Weight – 6.9kg
