

## Cyrus 8<sub>2</sub> DAC QXR Class-leading sound quality with system flexibility built-in

### Product Information:

The Cyrus 8<sub>2</sub> DAC QXR is the latest iteration of our higher-specification integrated amplifier. Available pre-built with the QXR DAC upgrade, this amplifier delivers an impressive 88 Watts per channel, and includes multiple digital and analogue inputs which you can individually name from a list of options in the setup wizard.

The USB input will work with file formats up to and including 32Bit, 768k and DSD 512, making this one of the most technologically advanced amplifiers on the market today. Cyrus, however, has always been about more than technical one-upmanship and this integrated amplifier delivers a level of refinement and control rarely experienced at this level.

Also included is a great headphone facility, twin speaker outputs for bi-wiring and a fully-featured, programmable remote control.

### Cyrus 8<sub>2</sub> DAC QXR features and benefits:

#### Trickle Down Advanced Technology:

The Cyrus 8<sub>2</sub> DAC QXR delivers surprising audio performance and value because it is based on the advanced preamplifier circuitry from the DAC XP Signature; benefitting from a 'trickle down' of our most advanced technology.

#### Integrated Amplifier:

The bi-wire output of the 8<sub>2</sub> DAC QXR gives a full 88 Watts into 6 ohms. The power supply is a high current design that uses two transformers to completely separate the digital control stages from the sensitive audio signals.

#### Integrated DAC:

The 8<sub>2</sub> DAC QXR features a high performance DAC bringing optical and coaxial inputs and an asynchronous USB connection allowing plug and play connectivity to a PC or Laptop.

#### Essential Connectivity:

Six analogue inputs, a high quality headphone amplifier, Zone 2 and pre amplifier outputs give the 8<sub>2</sub> DAC QXR flexibility for connecting a wide variety of audio devices. There is also a PSX-R port on the 8<sub>2</sub> DAC QXR allowing connectivity of the instant upgrade off-board power supply.

#### Advanced Setup:

The microprocessor controlled operating system in the 8<sub>2</sub> DAC QXR allows extensive programming of many functions within the unit. Input naming, differing display readouts and input volume matching across all sources are just some of the possibilities.

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.

All Cyrus components are manufactured in an advanced die-cast aluminium chassis and this hand finished casework is an integral part of the products' sound. It's not just about good looks; the chassis composition is specifically designed to create an electronically shielded and mechanically vibration-free environment for the sensitive audio circuits which are hung inside the inverted chassis, avoiding unwanted electric currents and secondary magnetic fields so the sound you hear is the very best that it can be.

### Cyrus 8<sub>2</sub> DAC QXR Specifications

Integrated amplifier	
Custom input naming	
iR14 Remote control included	
2 x Optical inputs	
2 x Coaxial digital inputs	
1 x USB input	
1 x Headphone output	
SPDIF supported formats	16/44.1k - 24/192k
USB supported formats	16/44.1k - 32/768k
DSD supported formats	up to DSD512
DOP supported formats	up to DOP128
Pre out	
Zone 2 output	
Headphone amplifier	
PSX-R upgrade port	
2 x 88W into 6 Ω	
Dimensions (H x W x D) –	73 x 215 x 360 mm
Weight –	6.9kg

### \*QXR upgrade compatibility:

The QXR upgrade is compatible with all of the following Cyrus amplifiers -

#### 6 series

Cyrus 6 XP	Cyrus 6a
Cyrus 6 XP DAC	Cyrus 6 DAC

#### 8 series

Cyrus 8 XP	Cyrus 8a
Cyrus 8 XP DAC	Cyrus 8 XP Qx DAC
Cyrus 8 DAC	Cyrus 8 DAC Qx
Cyrus 8 <sub>2</sub> DAC	Cyrus 8 <sub>2</sub> DAC Qx

#### Pre Series

Cyrus Pre XP	
Cyrus Pre XP DAC	Cyrus Pre XP Qx DAC
Cyrus Pre DAC	Cyrus Pre DAC Qx
Cyrus Pre <sub>2</sub> DAC	Cyrus Pre <sub>2</sub> DAC Qx

Cyrus audio products are designed, manufactured and supported at our headquarters in Cambridgeshire, England.
